	TopWater, WakeBait	Shad Color	Don't put'm up yet? Click Here
Dec	Sassy Shad 4"	Chartreuse,Glow,Naanaa	Slow roll it Sportsfans! Tail Dip peeps

NOTES:

I throw [Sassy Shad](#) 65% of the time. If it's soft plastic, I use [TAIL DIP](#). The info above are rough guesTAmates? Most of this will overlap. Pay attention to water temps. Match the hatch. If 6" shad are flying out of the water, don't throw a 3" Sassy Shad and reel it back SLOW! If you are fishing in 25' of water and it is windy, use a [1.0oz Jig Head](#). If you are fishing in 5' of water go with a [1/4oz Jig Head](#). I try to make my soft plastics fall as slow as possible. Where are the Birds? Pay attention to ALL birds. Have a pair of Kick A_s binoculars and use them! Hope this helps, if you have any questions please call; 214-906-3847

See Ya on the Water SportsFans
